Drawer Channel Solution

The powerful precision slide for complete design freedom.

A Drawer Channel System, also known as a drawer slide or drawer runner, is a mechanical assembly that allows drawers to open and close smoothly and securely. It consists of a set of metal tracks, often with rolling or ball-bearing mechanisms, that guide the movement of the drawer within a cabinet or furniture frame.

Synchronisation for excellent running characteristics

Unlike conventional concealed slide systems, Features a synchronisation mechanism. Even under high load, the excellent running characteristics of channel remain unchanged. Load capacities of up to 30-50 kg are no problem for the system. Abrasion-resistant plastic rollers ensure a smooth, even glide every time.

PLATINUM CHANNEL

FEATURES

- Weight : 72 gm $\pm$ 2/Inch
- Weight capacity : 45 kg
- Ball Bearing : 3
- Colour : Black / Zink
- Big end rubber
- Heavy grey plate
- Virgin accessories
- 10 Years Warranty

SIZE AVAILABILITY : 8" TO 24"

Modern Kitchen Solution

Luxury redefined with elegant kitchen accessories and style.

Fashionable artistic design, constantly evolving production techniques, and hidden practical function are dedicated to those who know how to enjoy life, allowing you to calmly enjoy the art of living.

Minimalist luxury design, non-slip, stylish, functional, and easy cleaning.

Slim sides design, interpreting minimalism and light luxury style, enhance the taste of kitchen storage. The bottom is covered by a non-slip mat to prevent items from collision and is convenient to clean at the same time. This thoughtful design not only elevates aesthetics but also boosts functionality, making everyday kitchen organization effortless, stylish, and more refined for modern living.
